DETAILED ACTION

In view of the discussion in the interview of 5/8/07, it was agreed that claim 20 should have been objected to as being allowable over the prior art of record.

Accordingly, this is a supplemental final action.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 19,23,32 are rejected under 35 U.S.C. 102(e) as being anticipated by either Walby 6,708,538. Walby teaches a combination lock having a number dial 18 and tumbler dial 19 with a key cylinder 20/16 and dial cam arrangement 32A mounted therein and wherein the key and cam 32A (tumbler dial) provide the combination changing means. The combination is changed (col.8, lines 1-14) by rotating the key to decouple the dial pin 38 on number dial 18 from the cam (tumbler dial) drive holes 40 to allow rotation of the number dial 18, relative the tumbler dial 19, to a new position indicated by a marker on the front face of the dial 18. The claimed method steps are considered inherent to the use of the combination changing means as set forth in Figures 22-26 and col.7, line 36 col.8, lines 1-14, which clearly recites rotating the key

Application/Control Number: 10/605,693 Page 3

Art Unit: 3676

counterclockwise to effect decoupling of the number dials to change the combination code. Note that col. 6, lines 64-65 recites that the unlocking function is effected by turning the key in a clockwise direction, therefore, the lock is not unlocked to change the combination code.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claim 21 is rejected under 35 U.S.C. 103(a) as being unpatentable over Walby '538 in view of Hermann 3,383,886. Walby fails to teach an offset key cylinder lock. Hermann teaches a combination dial and key cylinder lock wherein the key cylinder 6/8 is offset from the combination dial center portion 1,2. It would have been obvious to modify the shape of the combination dial to provide an offset key cylinder hole as taught by Hermann as an obvious matter of design choice.
- 5. Claim 22 is, as best understood, rejected under 35 U.S.C. 103(a) as being unpatentable over Walby 6,708,538. Walby fails to specifically teach the number of available combination code changes, however, it would have been well known to one of ordinary skill in the lock art to provide the combination lock with enough code disks needed to provide the desired number of code changes, such as the claimed ten changes, as an obvious matter of design choice.

Allowable Subject Matter

6. Claim 20 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments filed 12/26/06 have been fully considered but they are not persuasive. Contrary to Applicant's arguments, it is maintained that Walby teaches the method steps as claimed, including a number dial 18 and relatively rotatable tumbler dial 19, wherein the key is rotated counterclockwise to a second position to effect decoupling and allow the combination to be changed, then rotated back to the first locked position; while the unlock position is effected by rotating the key clockwise. It is noted that the Berkowitz '557 reference also would be valid prior art against claim 19.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 3676

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Suzanne Dino Barrett whose telephone number is 571-272-7053. The examiner can normally be reached on M-Th 8:30-7:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Glessner can be reached on 571-272-6843. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
